Career Objective

Dedicated and hardworking vocational student with hands-on training in Electrical Maintenance. Seeking an entry-level role in a reputed organization to apply technical knowledge, enhance practical skills, and contribute to team success.

Education

BA(political science), IGNOU 61%	2026 Patna
Iot(smartheathcare), Government W ITI, patna 90.3%	2025 Patna
12th, Dwarika high school, patna 56.8%	2022 Patna
10th, Dayanand kanya vidyalaya 62.1%	2020 Patna

Internship / Training

Artificial Intelligence Programming Assistant - By DGT, Microsoft and Edunet Foundation - NSTI W Patna 2025 - 2026	2025 - 2026
Responsibilities / Learning:	
• Learned to analyze, visualize, and derive business insights from data using Python, SQL, and BI tools. • Gained strong foundations in computer systems, operating systems, Python programming, and database management. • Built practical skills in AI, machine learning, deep learning, NLP, and computer vision for real world applications. • Developed end to end AI solutions using Generative AI, GitHub collaboration, and Streamlit deployment.	

Skills

- | | |
|--|---|
| <ul style="list-style-type: none"> • Power BI • Basic computer applications (MS Word, Excel, PowerPoint) • Data analysis • SQL • Cyber security • Power BI | <ul style="list-style-type: none"> • Pandas • Python programming • Growth Mindset • Adaptability • Problem Solving • Customer Communication |

Projects / Practical Work

Inventory Management System

- Tools: MySQL Workbench, Python (Designed and developed an inventory database system to store and manage product records. Performed CRUD operations and generated reports using Python-MySQL integration.)

Bank Loan Approval Analysis

- Tools: Excel / Python (Pandas, Seaborn) (Analyzed loan approval data to identify approval trends and important influencing factors. Created meaningful visualizations and insights for decision-making.)
- Hotel Booking Analysis Dashboard**
- Tools: Power BI Desktop (Built an interactive dashboard to analyze hotel booking trends, cancellations, and revenue insights. Applied filters and KPIs to highlight seasonal booking patterns.)
- Heart Risk Prediction**
- Tools: Python (Linear & Logistic Regression) (Developed ML models to predict heart disease risk based on health features. Performed preprocessing and evaluated model performance.)
- Image Caption Generator**
- Tools: Python, CNN + LSTM (Implemented deep learning model to generate captions for images. Used CNN for feature extraction and LSTM for caption sequence generation.)
- Aspect-Based Sentiment Analysis**
- Tools: Python, Pandas, Regex, NLTK, Scikit-learn, Matplotlib, Seaborn (Built NLP pipeline for aspect-based sentiment classification. Cleaned text data using regex and applied ML techniques for classification.)

Certifications

Introduction to Cloud Infrastructure: Describe cloud concepts Microsoft and LinkedIn, 2026	Career Essentials in Cybersecurity by Microsoft and LinkedIn Microsoft and LinkedIn, 2026	Exploring Basic Computer Concepts Microsoft and LinkedIn, 2026
Microsoft Applied Skills: Generate reports with AI research agents Microsoft Learn, 2026	Work smarter in Excel with Copilot Chat Microsoft Learn, 2026, 2026	GitHub responsible AI Microsoft Learn, 2026, 2026
